Tab,

How are you? I trust all is well and you are enjoying some beautiful spring weather. It has been beautiful here in Northeast Ohio over the past week.

I was wondering if you have any additional information regarding the status of the comfort letter request. I know the last time we spoke it was out for review in legal but that has been going on two months now and we were hoping it would be finalized by now.

Any information would be appreciated.

Sincerely,

PATRICK OBERTH

Subject: FW: Btu value and data table in the March 6 letter

Patrick

I am making sure I have clean copies of the incoming material to share with the legal staff. I see that your revised March 6 Incoming says 6,000-100,000 Btu, but the MSDS sheet says 6,000 - 13,000 Range; and 11,100 - 11,500 Target.

I assume that 100,000 Btu/lb is a typo. Previously we had 13,000 as the high end of the heating value spectrum.

I have a couple comments about the data table (apparently missing batch number for the last line of data and an extra value for Se). See the attached file.

I understand that you have spent a bit of time already getting the information to us, I hope this is the last follow up and the legal staff will not need to see anything in addition to (1) the letter, and (2) the follow up questions you recently answered. This e-mail is about the letter.
